THE PROBLEM

Prize competitions are broken

No Transparency

Traditional competitions hide draw processes.
Users cannot verify the draw was fair.

Hidden Costs

Complex pricing, subscriptions & variable
ticket costs make it hard to know what you pay.

Manual & Slow

operator-dependent. Winners wait days.

The global online prize competition market is valued at **\$10B+** and growing 15% YoY

TikTok & Instagram have normalised impulse purchases. A \$5 competition entry is the perfect social commerce product — low risk, high excitement.

GCC Growth Market

UAE & wider GCC have among the highest smartphone penetration globally, a young population, and strong disposable income. Perfect for prize competitions.

Automation = Scale
